

Julie Morales

I object to this data center coming to the southwest, a desert that is already scarce on water! No matter if they claim to be climate friendly with closed loop. We have zero water to spare as our Grand river has dried up, our lakes are extremely low, our communities are running out of water! Not to mention the heat and pollution and all the bad to the land, ecosystem, and planet! Do not bring you data center to NM now or ever !!! This is our land, the people's, the inhabitants of this beautiful planet! Stop trying to destroy it! From a native of the southwest!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
