We should be concerned about ecology and prevent planet from exhaustion. We are already facing with climate anomalies around world. Let's not forget that humanity's influence is strong on nature. Pollution is poison to not just nature itself, but also to animals both sky, ground and water. Everyone deserves clean air instead of another company draining resources to kill everything that breathe and live

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
