

Maitshwarelo .

What will chat gpt matter if we don't have a place to live? Even if AI can give us all the answers in the world, it's only doing harm if AI is gonna take from our planet and kill us slowly. The Earth doesn't need us, we need the Earth. There's no other planet that humans can live on. Unless you're an alien, that would explain why you could be so heartless. We have one planet. One Earth. But people would rather make rockets and fast cars, not caring how much harm it does to the world. Children are being born everyday, as the world dies a little more by the second, and AI Data centres are OK with that. You've lived your life, so don't stop young people from living theirs. The Earth isn't just a rock. It's our home, and if the rich continue to ruin the Earth, you're not hurting the Earth, you're hurting everything that lives on it. AI doesn't feel the consequences, but the humans, the ones that matter the most do. And I'm not going to sit back and watch the world get destroyed with things like CHAT GPT and Grok ai. None of that shit will matter when the water has run dry, the air is toxic to breathe in and the animals are dead. Don't make stupid decisions because you have a stupid amount of money to do so.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
