

Emily Hawes

I am a person who is not even of age to vote yet I know what is wrong and right, this project Jupiter is seriously WRONG, and is only seen good in the eyes of greed! I am a human being who is not sure where this is happening and is speaking out to this madness. This project should never happen and it'll only be in the mind of those who do not wish for a future nor change. What this people, what the government what's to do in this terrain is horrible. It affects multiple ecosystems that are only trying to live and humans like this, that support what is happening is making it harder! What is happening will not only destroy ecosystems around but the world too, effecting humans all across the globe no matter the sex, races or religion. It'll affect everyone!! Project Jupiter would just add to all the problems in the climate already affecting the world because of bigger companies needing more and more. This will affect the air we breath, the water we drink, it'll melt ice bergs faster, rising water temperature, drowning land and affecting drinkable water but at the same time with the land we have, the heat will cause droughts in field of food, erase the last bit of drinkable water. The world is already breaking apart form humans who supposedly think they can make it a better place but the world doesn't need us humans, we need the world and it was surviving peacefully before humans even thought of trying to "change the world for the better". We need to change the HUMANS to act and think better.!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
