

Patricia Dalby

As a resident of Dona Ana County I am deeply concerned about the possible detrimental effect Project Jupiter may have on our environment and air and water quality. I urge those in the position to approve or disapprove this air quality permit to follow any bills that Senator Jeff Steinborn puts forth and that they listen to and carefully consider outcomes from the public discussion and listening session that will take place - free to the public - on August 11, 2026, at the NMSU Corbett Center from 6:00-8:00 p.m. There is a need for greater transparency as well as public input prior to approval of this air quality construction application.
