

## Sierra Edmister

This community does not want this project. Even switching to fuel cells does not make things better. Fuel cells are new and unreliable at this scale and still have so much waste!!!! I hope you guys make this decision based on the reality we face in New Mexico when it comes to air and water. Anything that isn't reducing our emissions or reducing water waste IS EXACERBATING OUR CLIMATE CRISIS!!!  
Don't let them build this project!!!!
