No one wants a data center here. They ruin the environment and affect not only the animals but the people living in the area. We need clean water!! Not dirty water that comes from these data centers. NO DATA CENTER! There aren't even any job opportunities with it. One of the biggest data centers in the world only has TWELVE people running it. HOW IS THAT JOB OPPORTUNITY FOR ANY COMMUNITY??? The Rio Grande is already dry and so much wildlife are dying because of it. We don't need a Data Center taking any of the remaining water we NEED for DRINKING.
