

Reina Contreras-Cansinos

I am a resident from DE. The further construction that will be happening when 7000+ people have commented against it. The people know the long game ramification had when a dying business aids in killing the earth. The construction will be inevitably be a waste since it will never sell in real state either. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. There are also no pollution controls in place by the developers to at least take preventative for the community and environment.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
