

## Mariah Hothan

Please deny this data centers new air quality permit. Its just a whitewashed attempt to destroy our state. They see us as poor and desperate, that's why their lies are all centered around "bettering the community". We don't need their help, if we really want to be better we need to say no to Project Jupiter. Have you seen Memphis lately thanks to Musk's data center. Its killed that city just like every data center does. Everywhere they succeed the people end up losing and if we keep approving this nonsense then humanity as a whole will reap what we've sown when we end up in a tech wasteland with no natural beauty or natural resources. Please deny this air quality permit- for the sake of the people that live here, because i guarantee the people benefitting financially off of Project Jupiter are not going to be in NM and probably not even in the US. Its been proven over and again that the promised benefits are never close to being realized and all that people are left with is anger and regret. Deny this permit, please. The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa , in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism , because the people of Doña Ana County already suffer too much from environmental pollution. For years, Doña Ana County has been called a 'non-compliance' zone—this means that our air quality does not meet federal government rules.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
