

Miranda Jaramillo

As a New Mexican I do not want an AI DATA center in my state. My state is known for the Rio Grande, the beautiful Sangre de Cristo mountains and so much more. This ai data center would not only ruin the environment but be contributing to Ai. Humans are meant to create art and machines like Ai can never replicate a humans creativity. Do not build an AI DATA CENTER in my state. The right thing is to not build this center that will pollute our environment and harm our children. Think about your families and the environment. We do not need this crap in our state.
