Please do not do this. We need to protect the health of our planet, and our species, as humans. Doing this is further only going to cause problems and convince other companies and other people to do the same. We need to protect our air, our planet, and our people. Not only for now, for this generation, but also for the ones to come. So they don't have to try and clean up our mess. Please consider not harming our world and our future.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
