

Heidi Zamora Tamayo

Project Jupiter will put the lives of civilians and the world at stake. It will pollute our atmosphere and contribute to the highly dangerous ground level ozone, which is known to cause a multitude of health problems and hazards. It will contribute significantly to a warming climate while using up our fresh drinking water resources, that are already in danger. No one needs data centers, and us citizens definitely do not want them in our communities.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
