As a student in the states myself, i cant even imagine having to listen to the constant sound of humming coming from an unnecessary 'infrastructure.' The project is completely worthless, serving little, if not NO purpose at all. From reading other comments someone states, 'Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health...' I completely agree with them. Children, wildlife, and the elderly are VULNERABLE and FRAGILE. Children are at their peak of development, learning social interactions, learning, etc. Imagine how their learning and social interaction would be disturbed if Project Jupiter were to happen. Elderly should have peace, obviously as they are at their most vulnerable state where their senses are very sensitive along with the wildlife, varying from ages young and old especially with the fact that many species would be endangered because of the MASSIVE plot of land their A.I data center is taking up. Us humans do not need artificial intelligence to function, in fact its became a negative to humans as its been scientifically proven to shorten attention span ad it often givens an immediate answer, have students becoming to dependent and reliant on A.I. This is exactly what the government, in my opinion, wants. They want us to be deprived of knowledge, becoming more reliant on A.I which they could possibly then be manipulated into giving false answers. Using our clean water and electricity in the process, and for what..? Many people may not care until its too late, but when people finally realize that the government truly doesn't care, they will finally be seeing the rich living their life while the lower class has to watch and suffer from not fighting back and not speaking up. People must realize theres power in numbers.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
