

Kushi Flanagan

The Rio grande is already running dry early this year. We can't let it get worse. We can't let companies pollute our air more, and noise pollution is also an issue. Bloom energy also has a history of illegal dumping. Lastly, the air quality in dona ana county is already not meeting federal standards. Please deny the permit for project Jupiter. Protect our public health. Lastly please give an additional 60 days for public comment so everyone has a chance to comment. Thank you.
