We do not need any more data centers, or any at all. Just because you won't be here in 5 to 10 years doesn't mean that we won't. Our health (including yours and your families) should be top priority, not some AI that was never needed and could be shut off during a simple power outage. Ask yourself this. WHEN there's no drinking water, where will YOU find water to drink. WHEN you take over lands and fields, where will YOU get your food. Money won't matter anymore if you can't sustain yourself and get the nutrients you need to stay alive. But most importantly, money won't matter when you're dead. You're setting yourself and your FAMILY up for disaster. But most of all, we will have nothing if we don't have clean air.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
