project jupiter should stopped, they want us to trust in the project jupiter developers that building one of the largest data centers in the world, wouldn't threaten the limited water our communities depends on to survive. project jupiter will release 10 million tons of carbon dioxide annually affecting global warming. we were doing fine without AI and its massive carbon dioxide release along with water consumption, there is no need to add more carbon dioxide to this earth and water consumption communities need to survive. STOP PROJECT JUPITER FROM HAPPENING!!!
