Why must we aim to destroy what keeps us alive. The earth survived billions of years without us and once we are gone it will continue to live on. It is suffering under our hand. Climate change is moving faster than ever, We need water for food and drinking. There is no sane reason to have data centers, memories of greed will haunt all involved until they are dead, on your last days you will wonder why no one praises your life accomplishments and yet the answer will lay with who cheered you on through what destroyed your image and the world you claimed to want to better. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
