

Anika Volek

Do you remember that one saying? When the last tree is cut down, the last fish is caught, and the last river is poisoned; you will realize, too late, that you cannot eat money. Why do we need to get to that point! I already know we can't eat money. Why don't you?

Please don't kill our planet. We need her more than we need ai. We don't need ai, we need air, water, trees, land, animals. Please leave our planet alone.
