I do not want AI data centers because they ruin the environment, with this size of a data center, it will definitely hurt the environment a lot. Me and others do not want data centers, we were fine without the overuse of Artificial Intelligence. I know AI has been around for longer than most people, but this is getting bad. I hope we will be okay.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
