

CASEY BRADFORD

I do not live in the area affected by this, however this project will HEAVILY impact the rest of the world. With all of the plants, ai, and data centers, already tearing apart our climate and ecosystem, how could you possibly think building the largest data center in the world could help us, or even keep our world the same as it is today? This data center will lead our planet towards extinction. LISTEN TO THE PEOPLE, WE DO NOT WANT PROJECT JUPITER.
