New Mexico is already facing huge drought concerns and has been for awhile now. We do not want nor need this in New Mexico or anywhere for that matter. Our ecosystems need us to advocate for keeping it healthy and sustainable. Adding more data centers/ gas plants are only going to make everything worse to what is already a HUGE economic issue. 10 million tons Of co2 causing more global warming issues and harming our planet even more. This cannot happen.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
