I am writing to stand against project jupiter. we need to prioritise our one and only earth and not focus on AI data servers that we do not need to survive. we have thrived for generations without the use of AI so why start now when in record time we will not have safe water left. why would we need AI assistance if they have no one to assist. The public needs an additional 60 days to review and comment, the air quality permit application to be denied, if the permit is not denied a public hearing in santa teresa
