AI is slowly killing everything we deem precious to us. Without protecting the valuable resources we already don't have a lot of, the earth will collapse. It's not a statement of "what if" it's a matter of time. Unfortunately Gen Z is left to clean up the mess that was left behind by older generations. If we don't start now, there will be nothing left to fix. We don't need AI, we need water and clean air.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
