

Stephanie Janett

I have lived in New Mexico for 3 years now and I do not want Project Jupiter in our community! These horrible data centers and gas pipelines are nothing but a drain on this planet and all the species that reside here. Stop approving this kind of stuff so 5 dudes can be trillionaires while the rest of us will literally suffer from every kind of pollution known to exist. This is disgusting. By approving this, you are approving that you want millions of people (along with animals and plants) to become poisoned. Many people will die as a result of Project Jupiter. The American government has been giving the Native American and Hispanic populations a crap deal for over 250 years now. Enough is enough.
