

Anthony vail

I am a South African citizen who has dreams of travelling the world and seeing all that it has to offer, but this project, alongside many others that provide zero benefits to us as a species is actively preventing my dreams and aspirations from being accomplished. Not to mention the irreversible impact that this will have on the global climate if the project is approved. We don't need data centers to survive, and in 10 or so years when AI is obsolete, they will lay there abandoned and useless. I heavily oppose this project.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
