

## Sarah Hogland

I oppose Project Jupiter to the fullest extent. This data center will devastate our land, water and communities. The Rio Grande is already dry in Albuquerque. The waters will be poisoned and depleted in Doña Ana county. The profit in the short term pales in comparison to the long term destruction of life itself, including you and everyone trying to push this project forward. Your children and grandchildren children will suffer along with the rest of ours. Please do not go forward with project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
