

Alana Van Ness

Please stop hurting our planet. I'm 16 and I shouldn't be afraid that Earth won't be the same when I grow up. The people that rely on the clean water being used for that data center could die. The amount of toxins that will be released is exponential. Our planet is dying, you live here too. Why don't you care? Do you not realize the terrible impact ai data centers have? Ai is lazy and stupid, humans were just fine without it the many years we've survived. Honestly I just don't understand how someone could be so naive, cruel, and idiotic to think what you're doing is okay. Stop, please. Thats all I ask. Stop before it's too late. We're the last ones that can heal our planet.
