this NEEDS to not happen at all. it is a disaster for climate change, clean water, even wildlife. we do not need ai. we can life without it. the UK and europe are already suffering from climate change due to the massive heatwaves they CANNOT handle. a thousand people are already dead last i heard and the number just keeps climbing. me personally im in the east coast on the US, and theres a 5 day heatwave. we don't get heatwaves more than 2-3 days. this is really bad and we are destroying out own earth. we do not have another one. we are the last generation to do ANYTHING about it. please just stop or earth WILL be destroyed. please.
