Project Jupiter will be a horrific disaster to our planet and lives. This project is extreme environmental racism, an issue residents already suffer from. Bloom Energy has a documented history of illegally dumping waste with zero regard for people, animals, or this planet and have lied and forged documents in an attempt to cover up their disgusting actions. Residents should be given an additional 60 days to review and comment on the air quality permit, and if the permit is not denied, a public hearing must be held. They deserve a word in the fight against them having breathable air. AI is not necessary, the world spun without it and will continue to after the bubble pops. This soulless vacuum of resources serves no real purpose, our planet does.
