

Gloria Duran

Hello NMED staff, My name is Gloria Duran. I live in Las Cruces, New Mexico. I am writing to express my concern about the health risks and environmental damage Project Jupiter poses to New Mexicans and our home alike. I hope with my entire being and with the power of our savior Jesus Christ that the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. They are actively targeting our Hispanic and tribal communities with their emissions of NOX, CO2, and VOCs. Why don't they go build in California by Erewhon so celebrities and the rich can breathe these fumes? Oh, well because they have money and can send them elsewhere, like to OUR underfunded and underrepresented communities. BLOOM Energy ruined Pennsylvania and will absolutely decimate what is left in our flower of the desert, Doña Ana county. I am active participant in my community and would hate to see our children all grown up, but suffering in hospitals later in life due to an officials who serve without a conscience. "Others, as most legislators, politicians, lawyers, ministers, and office-holders, serve the state chiefly with their heads; and, as they rarely make any moral distinctions, they are likely to serve the devil, without intending it, as God" (Thoreau). Do not serve the devil. Reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Calling it a microgrid is an understatement of the century considering its MW capacity is 2,462 which almost matches that of the El Paso electric grid that serves my city of Las Cruces 2,900. Please hear the people's voices, we do not want ANY Yucca Growth Infrastructure in New Mexico. Sincerely, Gloria Duran
