

Jay Gallegos

I reside in Chicago Illinois where people are commuting daily and where thousands of homeless residents reside without regular access to air purifying systems. With additional data centers added to the world we push toxins into the air poisoning our citizens who are forced under this economy to work more than ever before. Stop the production of these data centers. WE DO NOT NEED MORE.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
