

Chantel Montoya

To protect and restore NM's environment and to foster a healthy and prosperous NM for future generations. More money should be poured into restoring the land and providing a more prosperous place to live for human and all living creatures. Money should also be poured in indigenous planting throughout the state, not into unwanted AI or new-world pollution.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
