

Teri Orr

I am writing out of grave concern regarding Project Jupiter and the green-washed project that will have devastating effects on our local ecosystem, people's health, and our future economy (re-tourism).

I am imploring three key things:

Given the devastating ecological impact of this project:

FIRST: 1. Deny the permit

Given that this project has picked up steam without sufficient dialogue, I note that 2. the public should be given an extra 60 days to review and comment if the permit were awarded.

FINALLY: if the permit isn't denied, we deserve the opportunity for a public hearing.
