Project Jupiter is a death sentence. The sheer amount of pollution just from ONE year will cause irreversible damage in multiple ways. This not only inconveniences the residents, but it is completely unnecessary and unfair. I REFUSE to spent the remaining years of my youth growing up in a world where I cannot breathe. Where I cannot drink clean water. Where I cannot see any local wildlife because they have all died. Where my voice ISN'T HEARD. This commentary needs to be open for at least another 60 days because it's only right to give people time to object this horrific project. We CANNOT eat money. We cannot drink expensive, non renewable oil. I don't care what they believe in, our earth is already a ticking time bomb. Please don't let this pass. I beg of you to consider the people growing up. The elderly who want to enjoy the rest of their stay. At the end of the day it is extremely serious and at the end of the day I don't want the morning and afternoon to be as dark as the night from smog and pollution. It is a basic humanright to stand up for one's opinion. I may be just one comment but I vote NO to project jupitor. A public hearing NEEDS to be allowed and included in Spanish as well to give opportunity to all. It's we the people. Not you the greedy
