

Pat Swan

I strongly oppose the Yucca Growth Infrastructure permit related to Project Jupiter. Have you heard of "Downwind" - the movie that documented all the aftermath of nuclear bomb testing? What's the difference? Environmentally, the project will create more air pollution and will deplete already compromised water resources. We are in a **SERIOUS DROUGHT!** The Southwest is no place for data centers. I 100% **DO NOT** support this and urge you to listen to your constituents, the people who will be stuck with the results of this bad decision.
