

Madelyn Reed

I am not a resident however this project will have a catastrophic effect on the environment as a whole. There are various wildfires, droughts and extreme heat advisory's in JUNE due to the rising heat and having mass amounts of carbon emissions will just add to the climate crisis. We are not even in the peak of summer and storms have been worse, earthquakes, and mass destruction due to climate change has already taken effect. Why is there snow in Idaho, mass flooding on the east and excessive heat in the midwest. If we do not take action to stop money hungry corporations from destroying the world as we know it there will be no future for humans to keep thriving as we once were, and that's my why.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
