

Diana Del Pozo

I live in Tampa which is a major city in Fl, and i'm going increasingly worried about the effects of AI on our planet. I've heard from many other people that data centers in their area cause extreme noise pollution and harm the environments around them. But besides just hearing about it, there's so much evidence and research to proof how harmful it really is. Truthfully, I'm scared. I don't know what's going to happen if we let things like Project Jupiter to happen.
