

Jessica Lee

I never wanted any AI data centers in New Mexico and neither does my family or friends.

AI data centers drink water and they steal electricity.

Water and electricity are for people, not AI data centers.

Please stop the building of the idiotic project Jupiter AI data center as the citizens of my state do not want it.

Keep your corporate hands off of New Mexico's small and meager desert water table and electrical grid.

I do not approve of this AI data center, and nor does my family.

It puts corporate profits before the welfare of New Mexico citizens and it will be a genocide for humans in favor of AI.

It is pure evil and you will be going straight to hell for building project Jupiter.

Once again, please cease and desist building this Evil corporate data center, project Jupiter, sincerely, a rocket scientist and biologist.
