Do not approve this project! As AI data centers have been rising up, more and more communities have been complaining of noise pollution, water rationing recommendations by their local governments for the benefit of private institutions. This project will further the climate collapse while providing a technology only useful to the shareholders and no one else. Vote no on Project Jupiter.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
