

Marina Butler

Bloom Energy's air quality permit should be denied. Doña Ana County is full of vibrant community members that deserve clean air. That county is already disproportionately affected by environmental pollution and Bloom Energy is known to dump hazardous waste that harms communities. If this permit is not denied, the public deserves an additional 60 days to comment on the permit in order to protect our beloved communities. A public hearing needs to be held in Santa Theresa in English and Spanish, with options to attend virtually so that community members can participate. Thank you.
