Hello i live in Texas which is not to far away from where y'all are building "Project Jupiter". This project will release a lot of Carbon dioxide in the air. If your not aware our air will be polluted because of this data center. I have relatives who are children and i would love to see them grow up and go to college. "Project Jupiter" might just make a drought , not only that we will have polluted air and water. We are human too and we don't deserve this. We all need clean air and water , not "Project Jupiter" or more data centers. We are hurting our earth each second of the day because of this. Plants that burn chemicals into our atmosphere are already destroying the environment and the planet. I hope that we can't stop this project now and continue to help our planet heal from all the damage we have caused.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
