Hi, I'm a resident of Las Cruces. New Mexico has always been a home, even when I wasn't living here for months at a time. This said, I request the denial of the Yucca Growth Infrastructure's air quality permit. The data I've reviewed shows very few positive effects that will take place if the permit is granted. That alone is enough for me to not want the permit to granted. I'd like to continue living in New Mexico with no worry of my quality of life because of man made infrastructure.
