

Sierra Necessary

Do not approve this facilities air quality or anything permit. New Mexican residents do not want data centers. They are wasteful to our water, destroy our planet, don't create meaningful jobs, make us dumber, and they pollute our air too. We do not want this. No one wants this. The people are fed up. Additionally they have canvassers posting FAKE COMMENTS FROM RESIDENTS ON HERE. Absolutely abhorrent behavior, can't trust these snakes as far as you can throw them. Shame on everyone supporting this project.
