I have been living in New Mexico my whole life. I love it here. We have a bright and vibrant culture, beautiful nature, beautiful sunsets. And we have so many indigenous tribes out here. Project Jupiter is a disservice to our people, our land and our joy. Although New Mexico is lovely we are already lacking so many resources and Project Jupiter will only send us more down hill. Project Jupiter will also only be disconnecting us more from our ritual, our tribal materials and the ancestors way of living. Especially with the Tortugas Pueblo, and the Apache tribe located in the Dona Ana county. The air quality permit application for Project Jupiter should be denied given Bloom Energy's history of illegal dumping hazardous waste. Since I am indigenous, I have already seen the effects of land altercations in my family and disconnect to my culture, just as Project Jupiter would do. Since I don't support AI, and I value our land so much, I do not support project Jupiter. Due to these factors we should be given the chance as the public to express our voice and how it would effect us. We should be given the chance to have an additional 60 days to comment on the air quality permit. And if the permit isn't denied we should be given a public hearing held in Santa Teresa, and online in both Spanish and English.
