

NA NA

I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. I want my children to be able to play and breathe the fresh air, not wearing masks or needing medical assistance to breathe. Help the world become better for humans and animals alike. Don't destroy it for greed or for the promise of AI. Please think of us and our country.
