We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence.
