

Christopher Currie

As a residents and local New Mexican I formally oppose project Jupiter and all outside data center companies. New Mexico is a unique state and culture that has been historically disrespected by outside forces in one form or another. Projecting Jupiter is just the latest in a long line of greedy outsiders that have no problem ruining our land for their profit. We need out clean air, open desert, and clean water for the residents of the state of New Mexico. The fact that any elected politician would even consider allowing an outside entity whose entire business model is designed to ruin natural resources and displace human involvement is deplorable. My hope is that all of these current iteration of invaders IE: the black rock/ pnm merger, project Jupiter, the Amazon expansion, etc are issues that future politicians can use as projects to stand against for the will and good of our states future. Law makers of our state, please listen to the voice of the people, we don not want these projects to move forward.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Thank you
