

Katherine Nelson

Hello, as a resident of New Mexico and a potential resident of Las Cruces I am extremely concerned about the environmental impacts of the proposed data center Project Jupiter. I have been watching other communities that have had data centers erected and the problems that these data centers create are enormous! Air quality is compromised greatly, heat index rises, water consumption is exorbitant and the noise generated is off the charts! All of these issues are greatly concerning & could dramatically impact the community of Las Cruces. Please take action to prevent this from happening. the air quality permit for this data center in Las Cruces should be denied! The public deserves a voice in this as well. We are asking for an additional 60 days to comment on this data center! The hearing for this needs to be in Santa Teresa. Approving this permit would be government sponsored environmental racism. Regards. Kat Nelson
