

Leenah Ragoonan

these AI data centers are taking up all of the fresh water WE NEED TO SURVIVE and is speeding up climate change. PROJECT JUPITER will cause tons and tons of carbon dioxide to be emitted in our atmosphere destroying our ozone layer therefore speeding up climate change destroying us and our planet. WE ONLY HAVE ONE PLANET, destroying it by using AI and creating AI data center that use tons of our fresh water daily, IS NOT A GOOD IDEA. there is no plan b. AI could be killing any chance for a future for the next generation. STOP PROJECT JUPITER or voluntarily be killing yourselves and the rest of the planet.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
