New Mexico is not the place for this. Asthma rates are up and my parents are supposed to grow old here. The drought and heatwaves will get increasingly worse until it is not safe to live here. The companies' behavior has already demonstrated that it does not care in the slightest about the repercussions their plant will have on the environment and the families who live near it.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
